## From The Editor’s Desk

**N**orthwest Chess has won the 2022 Chess Journalists of America (CJA) awards for Best State Magazine/Newsletter in both the Print and Online categories. This makes the ninth consecutive year we have been officially recognized nationally by CJA as the best! We won the Print category each year from 2014-2022 and since we’ve entered the Online category a few years ago, we have won that award too—except the first year was an honorable mention, but that’s still an award!

I feel that competition is tough, and it is never a sure thing that we will win. But we are tough too, and we work very hard to produce a high-quality magazine each month. This issue is my 118th consecutive month as editor, I’m getting close to the ten-year mark, and I don’t plan to stop anytime soon!

Many people are passionate about *Northwest Chess*, and I believe much of our success is due to the love and dedication people have always had for our magazine, going clear back to the beginning in 1947. It is this love I have always felt from the chess community that is the reason I know where there’s a will, there’s a way, and that is why I have always been optimistic and felt that we could produce an issue each month, even when it’s hard—even during the COVID-19 pandemic—because people do cherish our magazine and somehow a way is found to keep going!

Until the retirement of our business manager, Eric Holcomb, I have had the same incredible (but small) staff from day one since I’ve been editor, but he still contributes even after he’s retired! Brian Berger has decided to retire from submitting monthly cartoons, but I know he loves the magazine too, and I know he will *always* love the magazine.

Ralph Dubisch is much more than just a games editor. We’ve become great friends through the magazine, and his experience as an editor himself plus his incredible wisdom in many things adds much to each issue. Josh Sinanan, Wilson Gibbins, Duane Polich, Adam Porth... the names go on and on! But all add much value to the production value of these issues! I learn and grow with each issue. I try new things and build on old things, but each issue is unique and exciting.

I am writing this piece first (usually I write this part last) so I can only say, with a blank 32-pages in front of me at time of writing, that I look forward to seeing this issue grow and evolve into what it will be. It’s kind of an amazing process.

# 2022 Oregon Closed

## Wilson Gibbins

The Oregon Chess Federation held the Oregon Closed July 15-18 at the Portland Chess Center. The current format is an eight-player round robin Championship section (which decides the official state championship title) and an eight-player round robin Challengers section, with the Champions and the top Challenger getting seeded into next year's tournament.

The Championship section came in like a lion through the first six rounds, with 20 of 24 games ending in decisive results, including a second-round game between the top seeds Nick Raptis and

Matt Zavortink. Matt beat Nick in 2021 with the white pieces in a key game leading to his championship win. (See page four of the September 2021 issue of *Northwest Chess* to see how he did it.) This year Nick used the white pieces to dispatch what appeared to be his main competition and take an early tournament lead. But fifth seed Jason Cigan was playing great chess, starting with a first-round draw with Matt followed by five straight wins. Nick gave up a draw in round four to Ryan Richardson, last year's Challengers Champion, allowing Jason to catch him. Nick and Jason were paired in round seven, but after six rounds of

carnage, discretion proved to be the better part of valor, and theirs was one of the three quick final-round draws, leading to a tie for first. Corey Russell and Michael Swearingin chose to play a real game in round seven, and Corey was rewarded with a win, allowing him to catch Matt for a tie for third place.

In the Challengers section, Ishaan Kodarapu and Austin Tang tied for first. Austin won on tiebreaks, earning the entry to the Championship section in 2023. Austin and Ishaan both lost their first rounds, so showed a lot of grit in fighting their way back to the top. This

was in the face of the blistering pace set by Jeremy Waterman who won his first three games and led with 4.0/5 after five rounds. Jeremy ended up tied for third with Eric Erard. And unlike the pacifist Championship section, the Challengers section had four decisive games in the last round, allowing them to finish with a 78% decisive game result compared to the 75% rate of the Championship section.

Thanks to the Portland Chess Club for allowing us to use their wonderful facility for the tournament. And thanks to Greg Markowski, Mike Morris, and Wilson Gibbins for directing the tournament. Special thanks to Austin Tang and David Murray for setting clocks to the 40/90, SD/30;+30 time control.

We hope to see a lot of you back next year. But don't count on us keeping your slot open, as I expect the youth movement, led by Zoey Tang, to reclaim their rightful slots in the Championship Section next year.

This game was played during one of his early visits to Minnesota which must have made a good impression on him, as he ended up moving there permanently. ### 7...Be7

Engines prefer to try to stop White from advancing his pawn to e5 with 7...e5.

### 8.Ne1

Nick prefers a more traditional King's Indian approach of keeping the position closed to allow a kingside pawn advance. Lots of good traditional values here in Oregon Chess. From an historical perspective, I wish Nick would have played 8.Nh4 to honor the move 11...Nh5!? played on July 16, 1972 by Bobby Fischer against Boris Spassky in game three of their World Championship match, exactly 50 years before this game was played.

### 8...0–0 9.f4 Rb8 10.h3

Nick continues to avoid the engine-recommended 10.e5 and continues to avoid developing his pieces. Will the chess gods punish him? If you read the tournament report, you already know the answer.

### 17.g5 Bd7 18.Rf2 Ne7 19.h5 e5?

*Position after 19...e5*

Up until now Stockfish has been impressed with Black's position, but this space-grabbing move gets us back to equality. Who says chess is logical? Well, authors Irving Chernev and Erik Kislik, but other than that? 19...Na4? says Stockfish, but this is still a King's Indian, and White will continue to have chances against Black's king.

### 20.f5 Na4?!

20...fxg5 21.Bxg5 h6 looks like you are accelerating White's attack. But Stockfish says Black has equality, as he has sufficient room to defend. Maybe Matt wanted to avoid reminding Nick that he could develop his queenside pieces? ☺

Stockfish recommends bailing out with a draw by repetition with 27.Qf6+ Kg8 28.Qf7+ But one can't expect Nick to head for a draw when he up an exchange for a pawn.

27...Rf8 28.Nbd2

Nick develops a queenside piece! But with two bishops, an extra pawn, and a lot

of space, Black has more than enough for the exchange.

28...Be7 29.Qg3 Nb2 30.Bf1 Kh8?

30...Rf4! 31.Qh2 Rg4+ is unclear.

31.Rg2

And suddenly Stockfish prefers White again. White can make attacking moves on the kingside with his knights while uncovering an attack on Black's loose knight on b2. Even with a space disadvantage, White is playing on both sides of the board.

31...Bf6 32.Ng5! Rg8 33.Ndf3 Rg7

Jason Cigan (2169) –

Ryan Richardson (2045) [B90]

Oregon Closed Championship  
Portland, OR (R2), July 16, 2022

[Wilson Gibbins]

A game that exemplifies Jason's play in the tournament. He chooses a theoretically critical opening, exploiting White's built-in initiative instead of just deferring the battle to the middlegame. He invites a double-edged battle of attacks on the wings. Finally, he is able to foresee the tactical finesse required by this style of chess.

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.f3 e5 7.Nb3 Be6 8.Be3 Nbd7 9.g4!

9...Nb6 10.g5 Nfd7

The decentralizing 10...Nh5 is more popular and scores better.

11.Qd2 Be7 12.0-0-0 Rc8 13.h4±

White and Black have both been playing normal, logical moves, but the engines

say White stands a lot better. Maybe not quite winning, but Jason is comfortable in these tactical positions, as you are about to see.

19...0-0?

Allowing White to win a pawn, as Black's king was responsible for defending the knight on d7. Perhaps Black sacrificed the pawn, as it seemed less relevant than leaving his king in the center. 19...a4 is Black's best try. White stands better, but with both kings under fire, anything can happen.

20.Nxa5

The engine prefers interpolating 20.h6 g6 21.Nxa5

20...Qxa5 21.Rxd7

Position after 21.Rxd7

This doesn't look so bad for Black, as he is only a pawn down and has two bishops plus what appears to be a fast moving attack on White's king.

21...Ra8

Ryan finds Black's best try, but Jason has things tactically under control. If Black tries to save his bishop with 21...Rfe8 then 22.Ra7 Qb4 23.h6 g6 24.a3 Qd6 25.Rd1 Qe6 26.Nd5 gives White an overwhelming position. I wouldn't resign Black's position, but Stockfish might.

*[Wilson Gibbins]*

This game got Jeremy to 3-0 and an early lead in the Challengers section.

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Nc3 b5 6.Be3 Bb7 7.f3 Qc7 8.Qd2 Nc6 9.Nb3 Nf6 10.Nc5 Ne5 11.Nxb7 Qxb7

White has traded his development advantage for the two bishops, which

doesn't seem to be worth a lot in this position. White may be able to castle kingside safely, but White castling queenside or Black castling either way feels like castling into the attack.

12.Qd4 Nc6 13.Qd3 Ne5 14.Qd4 Nc6 15.Qd2 Ne5 16.b3 Rc8 17.Bd4 Qc7 18.Nd1 Nc6 19.Bf2 Bb4

Stockfish likes 19...d5 the standard Sicilian pawn break to open the center in spite of the fact that Black is a few moves away from castling. Stockfish is so brave. Jeremy's approach is to soften up White's pawn structure a little bit and then use piece play to harass White's king.

20.c3 Bd6 21.g3 h5 22.Qe3 h4 23.Rg1 Nh5 24.f4 e5 25.f5 hxg3 26.hxg3 Nb4!?

Position after 26...Nb4

I wanted to label this "?!", but as this sacrifice creates too many problems to solve over the board, I promoted it to "!" Black is objectively better if he does not sacrifice, objectively worse if he does, but the course Jeremy takes is much more entertaining for all involved, with the possible exception of Jerry. The resulting position will be very difficult to play accurately, but Jeremy does a better job of making the most of his opportunities.

27.cxb4 Bxb4+ 28.Ke2 Nf6 29.Kf3±

An attacking move that helps White

migrate heavy pieces towards Black's king. But it doesn't work out, as White's pieces don't get to Black's king quickly enough, and the weaknesses left behind, especially on e3 and f2, eventually proves fatal.

*[Wilson Gibbins]*

The key game in the Challengers section. These two players have faced each other 14 times previously, so they both have a fairly good idea about what might be coming. But as they had a week to prepare, one can assume they both have made a few adjustments to their opening repertoire.

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e5 5.Nb5 d6 6.c4 Be7 7.N1c3 a6 8.Na3 f5**

Ishaan played 8...Be6 in round three of the 2022 OSCF Middle School Championship, with the game ending in a draw.

**9.exf5 Bxf5 10.Bd3**

Tony Rotella gives this an exclamation mark in his book, *The Killer Sicilian*. Austin played 10.Nc2 against Ishaan in the 2021 Oregon Junior Closed, the game ending in a draw after 61 moves. Both moves seem equally playable, according to databases and engines.

**10...Be6 11.Nc2 Nf6 12.0-0 0-0 13.Ne3 Nd4 14.b3 Rc8 15.Bb2 Qd7 16.Ncd5 Bd8 17.f4 Bxd5 18.cxd5**

*Position after 18.cxd5*

**18...Bb6**

The engines' second choice, but it seems logical and fun to intimidate White's king down the b6-g1 diagonal. Stockfish and Leela slightly prefer 18...g6 perhaps to allow Black to bypass White's f-pawn without allow an en passant capture in lines such as 19.f5 g5, but White still has a slight edge after 19.fxe5 dxe5 20.Nc4± as 20...Qxd5?! loses the exchange after 21.Ba3 Re8? 22.Nd6.

**19.fxe5!**

Austin's move is stronger than immediately moving the king away from the bishop's attack with 19.Kh1 and allowing 19...e4 20.Bxe4 Nxe4 21.Bxd4 Bxd4 22.Qxd4 Rce8 which looks like a clear pawn to me, but Stockfish says Black's well placed knight gives him compensation.

**19...dxe5 20.Kh1!± g6?**

20...Bc7 avoids the ensuing problems because 21.Nc4 no longer attacks an undefended bishop, so Black can calmly play 21...Qxd5; 20...Kh8 is another approach to the defense, getting Black's king off the dangerous c4-g8 diagonal to make capturing White's d-pawn with the Black's queen less risky. 21.Nc4 Bc5 22.Nxe5 Qxd5; 20...Rce8 avoids a knight fork on b6, and defends the e-pawn.

5.d3 WG: is the King's Indian Attack,

### September 3-5, 2022

which my generation over-valued because Bobby Fischer had success with it. Today's repertoire books claim that Black is fine, but when the words "King's Indian" are in the opening name, you can be sure that fighting chess will ensue.

### 5...b5

WG: Trying to prevent White from opening the game with 6.c2-c4, but Matt is persistent.

### 6.a4! b4 7.c4! Bb7

MZ: The most natural continuation seems to be 7...bxc3 8.Nxc3 when Black has an obviously superior structure. But Black is dangerously far behind in development. Trying to castle quickly with something like 8...Be7 runs into 9.dxc5 Bxc5 10.e4 and the position opens in White's favor.

### 8.Nbd2 Nbd7 9.cxd5 Bxd5 10.e4!

White sacrifices a pawn to maintain his lead in development.

### 10...Nxe4 11.Nxe4 Bxe4 12.Re1 Bd5!±

MZ: The move 12...Bb7? runs into 13.d5 with the entertaining line 13...Nf6 14.dxe6 Qxd1 15.exf7+ Kxf7 16.Rxd1± White has regained the pawn but more importantly the immediate threat of Ng5+ forces Black to make a major concession like ...Bxf3 or ...Kg8.

WG: After 12...Bxf3 the sequence 13.Bxf3 Rc8 14.Bf4 Be7 15.Bb7 nets White the exchange.

### 13.dxc5 Nxc5

WG: Not 13...Bxc5? 14.Qxd5;

MZ: The best continuation for Black is 13...Be7! 14.Bg5! Nf6 This variation might represent "best play" from both sides after 5...b5; the computer says White has an edge though practically it's hard to tell if the c5-pawn is more of an asset or a liability.

### 14.Bg5 Be7 15.Bxe7 Qxe7 16.Qd4±

WG: And White has a significant advantage despite Black not making any particularly dubious moves. Black will need to invest some time and probably his b-pawn to get his king to safety.

### 16...Kf8?!

16...0-0?? 17.Qxd5 exd5 18.Rxe7; 16...f6! 17.Rad1 Rd8 18.Qxb4 0-0 19.Rc1 Rc8 20.Nd4 Bxg2 WG: And White has some advantage after the complicated 21.Nxe6! (or the simpler 21.Kxg2).

### 17.Rad1!

MZ: I thought 16...Kf8 was actually very clever, as now I really should not play 17.Qxb4 allowing 17...Nd3 when White must enter a thankless endgame with 18.Qxe7+. I also have to defend against ...Nb3 so it was only through process of elimination that I arrived at 17.Rad1 which is by far the strongest move, but not immediately obvious. The difference between 16...Kf8 and 16...f6 is that after ...f6 White can take on b4 and ...Nd3 will drop a piece to Qb5+.

### 17...Nxa4 18.Nh4!

Position after 18.Nh4

### 18...Nb6?

WG: This is logical, getting the knight back into the game and shoring up the defense of the bishop on d5, but White has a trick. 18...Qc5 is best but insufficient to hold the game. In many of the lines, White is attacking Black's king with three or four pieces, and Black is defending with only one or two, as his knight and at least one of the rooks ends up serving as spectators.

MZ: I had seen that I can continue the attack with 19.Qf4! which cross-pins the d5-bishop to the d7-square, as allowing 20.Rd7 will lead to some kind of queen and rook mate on f7. White is also threatening 20.Rc1 with a similar rook invasion on the 7th rank. I felt like this was immediately decisive. During the game I did NOT see the computer's suggested 19...Nxb2 with the point that now Black can meet 20.Rc1 with ...Nc4, blocking the c-file (or perhaps ...Nd3 going into an endgame with three pawns vs a piece). I think I would've found Rd4 or Rd2 though, as the positions where White is allowed to take on d5 and then go Nf5 seem very hard to defend as Black.

20.Rd4! WG: Black is up three pawns, but the engine says White is winning. 20...Nc4 21.Bxd5 exd5 22.Nf5 h6 23.Ne7 Nb6 24.Rd3 Rd8 25.Rf3 and Black's defenses are crumbling.

And now ...Qb4–e4+ would win. — Fritz I've looked at this for quite a while and as long I am careful where to put my king I don't see a win for Black. In any case here I cannot play for win as my opponent can draw at will with perpetual check. I also knew a draw offer could alter my opponent's thinking—that is he can see that he can win two pawns with check. Also if I am careless he can even pick up my d-pawn with check which would then make it an easy win. My draw offer probably confirms to my opponent that he *must* be winning. This led to fatal thinking. Objectivity is crucial for chess success. -cjr

36.d6 Qe4+ 37.Kf2 Qxf4+ 38.Ke2?

38.Ke1 was necessary.

38...Qxh2+-+ 39.Ke3 Qe5+ 40.Kf2 Qg3+ 41.Ke2

Intending d6–d7. — Fritz

The reason I believe Black needs to take the perpetual is because of three key lines: 1) 41...f4 42.d7 Qe3+ 43.Kf1 f3 44.Bc4! wins; 2) 41...f4 42.d7 f3+ 43.Ke3 f2+ 44.Ke2 Qg1 45.d8(Q) wins; and 3) 41...Qg2+ 43.Ke3 Qe4+ 44.Kf2 h3 45.d7 h2 46.d8(Q) h1(Q) 47.Qg5+ leads to mate. Thus, these lines show that Black must win in two non-checking moves. If I queen first, Black's exposed king ensures a white win. -cjr

41...Qg4+ 42.Kf2

Hoping for Rd1–g1.

Position after 42.Kf2

42...f4??

I disagree with Fritz's analysis. I believe White can hold. So here Black probably realized that ...Qg3+ is three-fold repetition. He also greatly underestimated Kf2 as I was just "responding" to his check and running. Plus, he might have interpreted my move as a draw offer. And I am an exposed king with no pieces

able to block for me what could I do? My opponent had also spent all his regulation time and was on increment only. He was no doubt greatly fatigued at trying to find a win in an equal position. Thus, all of this contributed to his fatal mistake. -cjr

42...Qf4+-+ 43.Ke2 Qh2+ 44.Ke1 Qg3+ 45.Ke2 f4

43.Rg1+- Qg3+ 44.Rxg3+ fxg3+

KB-K3P

45.Kg2

Intending d6–d7 and mate. — Fritz

While I am winning, careful thought is still required. There's a number of issues to work out such as my weak d-pawn and dealing with the black connected passers. -cjr

45...Kf8 46.Be6 Ke8 47.Kf3?

Fritz's question mark is nonsense; my move is just fine. -cjr

47.Bh3 Kf7 48.a4

47...Kd8?

47...Kf8 48.Bd5 Ke8

48.Bh3 b5 49.a3

My move here is also good. Generally speaking, denying Black any free moves is helpful for White. So, I disagree with Fritz here too. -cjr

49.Ke4 Ke8 50.Ke5 g2 51.Bxg2 Kf7 52.Bh3 Kf8 53.Ke6 Ke8 54.d7+ Kd8 55.Kf7

49...Ke8 50.Ke4!

Precision: White = 44%, Black = 53%. — Fritz

Here White's true purpose is revealed. He will win with the d-pawn as Black can't win it. e.g. 50...g2 51.Bxg2 Kd7 52.Kd5 holds the pawn. Also, thanks to the white KB, Black will be unable to prevent the white king from getting to c7 which in turn will guarantee the white d-pawn sees its destiny. Therefore, Black throws in the towel and goes home (this was the last round). -cjr

# Kids Say The Darndest Things At Chess Camp

Karen Schmidt

A few months ago, Seattle's Detective Cookie (locally famous police officer who has run a free Saturday chess club in the Rainier Valley neighborhood for the past 15 years) asked me if I would be interested in teaching a summer chess camp at the Green Lake Community Center in my Seattle neighborhood. The Seattle Parks and Recreation Department had wanted her to teach it, but her police work schedule was too busy. I told her I was interested, and a few weeks later I got an email from the Parks Department... and it evolved that I did teach two week-long chess camps, one in July and one in August.

Although I had been the assistant coach at my son's elementary school chess club (a few decades ago), and have been teaching my two neighbor kids private lessons for about two years, I was a bit anxious about coaching ten seven- to nine-year-olds all by myself for three hours a day. As a young child growing up in Yakima, I had loved watching the Art Linkletter television show, *Kids Say the Darndest Things*. Little did I know that I was about to hear some pretty funny stuff in real life at chess camp.

I prepared for the first session as well as I could ahead of time. Happily, the Washington Chess Federation loaned me five chess sets and the Community Center provided a hanging chess instruction board. On day number one I was seated and ready early in the nice upstairs space, awaiting the arrival of my charges. The first boy and his mom arrived, and I introduced myself as Coach Karen. The boy announced, "My name is Judah and I'm a boy." I was a bit taken aback but chuckled to myself, showed no reaction, and asked "Does that mean some people think you're a girl?" He matter-of-factly said, "Yeah... most of them... because I have long hair." (As if I hadn't noticed when he came in that he had beautiful long wavy brown hair down to his waist.) It turned out that Judah knew more about chess than the other kids, so he became my right-hand man for the first couple days.

There were seven boys and two girls in the July group, and surprisingly, the girls were the rambunctious ones. All nine students were pretty good beginner-level players, and by employing high energy and lots of teaching tricks, I was able to keep them focused quite well—although those two girls were a challenge. In both

sessions, the first couple days were spent learning or reviewing how all the pieces move and capture; the point values of the pieces; a short history of the game of chess; and playing pawn battles. Then as the week progressed, we moved on to classic chess, the main principles in chess, and tactics such as pins, forks, and skewers.

Thankfully there was a 15-minute snack break at 10:15 AM each day, and I was allowed to take the kids outdoors to play on the adjacent playground. On day number one in July, I was in a bit of a panic during the recess, because there were about 200 kids on the playground. (I was madly counting heads to nine for the duration... alarmed at the possibility that I could lose one of my students.) After I did a very loud two-finger whistle at the end of the break and called the chess kids over, all seven boys came running. The two girls continued playing as if they hadn't heard a thing. Each day at the end of the recess, I would pick a boy and ask him to please run over and tell the girls "Coach Karen says to get over here." It worked well.

One day that first session I decided to wear my fleece Batman pants—black with

the classic yellow logo. When everyone had arrived, a calm and studious boy named Kieran sized me up and asked me, “Why are you wearing pajama pants?” I replied that SOME people might wear these as pajama pants, but I wear them as regular pants. That seemed to satisfy him, although I wondered if perhaps he had a pair of Batman pajamas at home. (In truth, these probably WERE fleece pajama pants...)

One July morning Kiaan raised his hand and when I called on him, he asked if we knew that a teenager had beaten World Champion Magnus Carlsen. I asked him when that had happened, and he told the group that it was about three months earlier, and that the boy was from India. (Kiaan is of Indian ancestry.) He didn’t know the teenager’s name but volunteered to research it that night and let us know the next day. True to his word, when he arrived the following morning, he came up to my table and printed the 16-year-old’s name for me. (Rameshbabu Pragganandhaa)

I asked Kiaan if he would please pronounce the boy’s name for us, and he replied, “You try it!” I gave it my best shot and did ok on the first name but was way off the mark on the last name. Kiaan pronounced the name correctly and told us that the teenager probably speaks Hindi. I was impressed with Kiaan’s enthusiasm doing online research and then sharing the results with the group.

I had to laugh at the close of day number one of the July session. Judah—my right-hand man—came up to me and asked, “Tomorrow are you going to cover castling and en passant?” I answered, “Absolutely!” But to myself I said “I guess I am now!”

At the end of that first week, we had a little two-round tournament on the last

day—one round before recess and one after. As they started the first game, I was amazed that the room was suddenly silent. They had actually absorbed and taken to heart everything I taught them in that short week: including no talking during tournament games: the only exceptions being “check,” “checkmate,” “en passant,” “I offer a draw,” and “I resign.” I sat down at the front table for the first time all week. It was extremely gratifying to see how much the boys and girls had learned in five short days.

On August 10, I was fortunate enough to have a special visit at the second chess camp by Detective Cookie. She spoke to the boys and girls about safety issues such as strangers and bullying, as well as

the history behind her Detective Cookie Chess Club, and then she took questions. The children were pretty excited to meet a real live police officer who is also a chess expert! She wrapped up her visit by watching them play chess games, and she gave some individual tips and pointers.

I hope that the Seattle Parks Department will run several more chess camps next summer, and that I can repeat this very exhausting, very rewarding, and often hilarious teaching experience. A word of warning though: coaching a chess camp three hours a day is not for the faint of heart. Be prepared to be starving by noon, wishing for an afternoon nap, and hearing some very funny *Candid-Camera* type stuff.

# An Ode To Winning At Chess

By Nobel Ang

The knight jumps nimbly through the enemy ranks

Enemy pawns and queen alike tremble in fear

At the approach of this fearsome unpredictable beast;

The bishop zips confidently through holes around the enemy king

Slicing through whatever little remains of the crumbling enemy fortress.

Checkmate is nigh and morale is low

The opponent tries vainly to sue for peace (“Would you like a draw?”)

Knowing full well what the answer would be (“Hell no!”).

There is little in this world

Or the next

That can compare to the incredible almost unbearable lightness

Of winning at chess.

Winning at chess

Makes one feel that one might be the best thing that has happened to chess

Even though

None less than Kasparov has warned

That satisfaction with victory can lead to a lack of vigilance and future defeats

Even though none less than Capablanca has counseled

That one learns much more from defeats than victories.

All of which may well be true

But why deny myself this wonderful lightness of victory in this present moment?

Who knows when Caissa

Would deign to smile again on my fortunes over the sixty-four squares?

# Detective Cookie Chess Park Ground-Breaking Ceremony

By Josh Sinanan

On Sunday June 12, several chess players and supporters of the future Detective Cookie Chess Park gathered on the corner of South Barton Place and Rainier Avenue in South Seattle from 2-4 PM to officially break ground and begin construction of the future Detective Cookie Chess Park!

Seattle Police Detective Denise “Cookie” Bouldin runs a chess club for Rainier Beach Youth and is currently assigned as a Youth Outreach and Community Relations Detective. Detective Cookie’s vision is to inspire and empower local youth by providing them with the life skills learned through chess. The project has culminated with the creation of a public park in Rainier Beach, Seattle, where chess can be played outdoors on built-in chess tables and on a giant in-ground chess board. The event featured free food, good company, and of course chess. In attendance were Detective Denise “Cookie” Bouldin, Seattle Chief of Police Adrian Diaz, former Seattle Seahawks player K.J. Wright, WCF Women’s and Girls Director Chouchanik Airapetian, and WCF President Josh Sinanan among others. Many thanks to the City of Seattle, Four Culture, and Seattle Parks Foundation for their support.

### Section Champion(s):

K-4 U1100 – First Place: Elijah Edwin (4.5/5)!

K-4 Open – First Place: Yuchen Zhou (5/5)!

5-12 U1300 – First Place: Hasini Juluri (5/5)!

5-12 Open First/Second Place: Vijay Patankar & Gordon Winter (4/5)!

Now it is my pleasure to turn it over to Third Grader Lakshana Anand, who finished in Second Place in the K-4 U1100 section. Lakshana has kindly recounted her tournament experience and annotated one of her games for the *Northwest Chess* readers to enjoy.

The Summer Sizzler tournament ended on Saturday, July 16, and all the participants were of different ages, but all were tough. I, myself, had rough competition! As a strong chess player,

you must uphold your name of greatness (especially in tournaments)!

And these 1st graders did just that.

The Best (at chess) 1st Graders on Earth!!!

Jonathan Lan and Elijah Edwin are 1st graders who are probably destined to be grandmasters. If I had defeated at least one of them, I would have won the U1100 K-4 section of the tournament. Instead, Elijah did, and I was in second. I am only a third grader with high hopes, so who are you kidding?!

Elijah ended up with a 1-1-0.5-1-1 score, and I had a 1-1-0.5-0.5-1 score. 4.5 is bigger than 4, so Elijah won. Congrats, Elijah and all participants!

## Vancouver Open

By Josh Sinanan

The Washington Chess Federation hosted the Ninth Annual Vancouver Open July 23-24, 2022, at the Vancouver Hampton Inn & Suites. Chess players from throughout the Pacific Northwest were represented in the 64-player field, from cities including Portland (Oregon), Mercer Island, Vancouver (Washington), Sherwood (Oregon), Redmond, Bothell, Anacortes, Ridgefield, Kirkland, Shoreline, Bellevue, Battle Ground, Olympia, Sammamish, Napavine, Edmonds, Camas, Pullman, Duvall, Woodinville, Lake Oswego (Oregon), Beaverton (Oregon), Gresham (Oregon), Medina, and Seattle. Despite the proximity to the Oregon-Washington border, only ten Oregon players took part, compared with 54 from Washington State! The tournament was directed by WCF Scholastic Director Rekha Sagar with assistance from WCF Women's and Girls' Chess Director Chouchan Airapetian, WCF Treasurer Robert Allen, former WCF Tournament Coordinator Dan Mathews, and WCF President Josh Sinanan. The field was split evenly between two sections, with 33 players in the Open and 31 in the Reserve U1700.

*Jack Christy, winner of the Vancouver Open Reserve U1700 section.

As has been the trend both locally and nationally, more scholastic players are coming out to play, even in Open tournaments such as this one, which traditionally attracted more adult players. Specifically, 28 adults and 36 juniors took part, with a higher concentration of adults (18) in the Open section and junior players (22) dominating the Reserve section.

In the Open section, top seed FIDE Master Marcel Milat (4.0, 2351 → 2352) from Woodinville and college student Brian Lee (4.0, 1949 → 1947) from Napavine shared first place with 4.0/5. Milat, who was in the area for business,

came out of retirement and played in his first event since 2018. In fact, Milat was the only at-site registrant for the entire event! Despite taking two half-point byes due to dinner plans on both evenings, he still managed to tie for first place, winning against up-and-coming juniors Edward Li and Ted Wang along the way! For Brian Lee, it was his second consecutive Vancouver Open victory, as he had tied for first place with Zoe Tang in 2021. Six players shared third/U2200/U2000 honors half-a-point back: Josh Sinanan (3.5, 2259 → 2238) from Seattle, Micah Smith (3.5, 1944 → 1961) from Vancouver (Washington), Michael

*Brian Lee, 2022 Vancouver Open Co-Champion.

Hosford (3.5, 1835 → 1836) from Olympia, Ted Wang (3.5, 1844 → 1863) from Medina, Harrison Toppen-Ryan (3.5, 1792 → 1818) from Kirkland, and Ujwal Garine (3.5, 1447 → 1643) from Redmond. Washington State's strongest fourth grader, Vihaan Jammalamadaka (3.0, 1663 → 1763) from Redmond, won the upset prize by virtue of scoring a 596-point upset against his former coach, WCF President Josh Sinanan! National Master Zoey Tang (3.0, 2226 → 2215) from Portland, Oregon's strongest female chess player and last year's Vancouver

Open Co-Champion, won the best female player prize.

In the 31-player Reserve U1700 section, experience prevailed over youth despite the abundance of participants who were still too young to have a driver's license! Jack Christy (4.5, 1400 → 1496) from Anacortes emerged victorious with an impressive four wins and one draw from five games. Jack has been playing tournament chess since the early 90's and has worked with his coach IM Georgi Orlov on and off over the years.

This was Jack's first tournament win in as long as he can remember, and it was a convincing one, as he allowed only a single draw against the solid Varnika Jammalamadaka in the second round. John Strohbehn (4.0, 1400 → 1410) from Vancouver (Washington) finished in 2nd Place half a point back, scoring clutch wins in the final two rounds against Washington whiz kids Yuchen Zhou and Dann Merriman. Similar to the Open section, six players tied for 3rd/U1600/U1400/U1200 with 3.5 points apiece: Daniel Vasey (3.5, 1507 → 1501) from Gresham, James "Skip" Hamlett (3.5, 1420 → 1431) from Shoreline, Emerson Wong-Godfrey (3.5, 1437 → 1477) from Seattle, Phil Stephenson (3.5, 1281 → 1372) from Beaverton, Anisha Sripada (3.5, 1303 → 1327) from Portland, and Kenneth Yuodelis (3.5, 1001 → 1109) from Bellevue. A trio of new players tied for the 1st Unrated prize with 2.5 points apiece: Brian Corcoran (2.5, unrated → 999) from Ridgefield, Neil Kossuri (2.5, 157P3 → 403) from Bothell, and Teja Koripella (2.5, 1446P10 → 1419) from Sammamish. Yuchen Zhou (2.5, 797 → 914) from Bellevue was awarded the biggest upset prize by virtue of winning against a 358-point higher-rated player. Team Jammalamadaka struck again in the Reserve section, this time with Varnika Jammalamadaka (3.0, 1531 → 1505) of Redmond, Vihaan's older sister, claiming the best female player prize. Varnika won the best female prize with a tournament performance rating (TPR) of 1354 by winning her first game and then drawing the remaining four. Congratulations to the winners, and many thanks to all who contributed to this successful event!

#### **1.d4 Nf6 2.c4 Nc6 3.Nf3 e6 4.a3 d5**

I was expecting 4...d6 followed by 5...e5 which is more popular and scores better than 4...d5. After 4...d5 the knight seems a little bit misplaced on c6 blocking the c-pawn.

#### **5.Nc3 a6 6.g3?**

Usually when White allows the capture on c4 he is able to regain the pawn or get enough compensation with play in the center or with tricks down the h1-a8

diagonal, but here neither is the case. Both of us missed this for the next couple of moves. In the future I would play 6.cxd5 and develop normally.

**6...Be7?**

6...dxc4 7.Bg2 Be7 8.0-0 Na5 9.Bg5 b5 10.Ne5 Rb8 Black keeps his extra pawn with a better position.

**7.Bg2? 0-0? 8.0-0? dxc4**

Finally capturing.

**9.e4 b5 10.d5?!**

d5 is a normal idea in this structure but here it leads to trouble with my rook on a1, which was honestly the furthest thing from my mind.

**10...Na5 11.Bf4 Nb3**

*Position after 11...Nb3*

**12.Rb1?!**

White can save the rook by playing 12.dxe6 (12.Ra2 is a terrible place for the rook.) 12...Bxe6 (12...Nxa1 13.exf7+ Rxf7 14.Qxa1) 13.Qxd8 Rfxd8 14.Rad1 but this is a miserable endgame which I would never choose over keeping queens on the board.; Since I am losing material anyway, an interesting try is 12.Nd4 Nxa1 13.Nc6 Qe8 14.Qxa1 (14.Nxe7+ also leads to a losing endgame after 14...Qxe7 15.d6 Qd8 16.e5 Nd5 17.Nxd5 exd5 18.Qxd5 Rb8 19.dxc7 Qxc7 20.e6 Bxe6 21.Bxc7 Bxd5 22.Bxb8 Rxb8 (22...Bxg2 23.Rxa1 Rxb8 24.Kxg2) 23.Rxa1 Bxg2 24.Kxg2)

**12...exd5 13.exd5?! Bf5 14.Ne5 Bd6**

The rook is still trapped so Black makes a good decision stopping White's counterplay.

**15.Nc6 Qd7 16.Bg5 Bxb1 17.Qxb1 h6?**

Loses a tempo and allows White to destroy Black's pawn structure in front of his king.

17...Ng4+

**18.Bxf6 Nd2??**

*(L-R) WCF Treasurer Robert Allen, President Josh Sinanan, and Scholastic Director Rekha Sagar make the pre-round announcements at the Vancouver Open. Photo credit: Haiyong Wang.*

This loses all of Black's advantage. Black still remains up material but he loses a lot of his activity. I had a feeling my opponent was planning this after he played 17...h6 because there was no other reason to allow 18.Bxf6. 18...gxf6 Black is still winning although White has some counterplay now thanks to Black's damaged kingside structure.

**19.Qd1**

I think another reason my opponent played 17...h6 was because of the line 19.Qc1 Nxf1 when if not for the pawn on h6, White could play 20.Qg5.

**19...Qf5??**

*Position after 19...Qf5*

My opponent told me that he thought he had gotten too greedy and decided to bail out. Unfortunately, he miscalculated and thought he was still up the exchange but then realized later that I had gotten two pieces for the rook instead of just one. 19...Nxf1 20.Ne4 Nxb2 21.Kxb2 Qf5 22.Bc3 White has three minor pieces for two rooks and two pawns, which still gives Black a significant material advantage, but the White's activity compensates for

that. Computer says equal but with such a strange material imbalance it seems unlikely that this will be a draw with two humans playing.

**20.Qxd2 Qxf6 21.Ne4 Qg6 22.f4 f5 23.Nxd6 Qxd6 24.Qc2 Rae8 25.Kh1 Qc5 26.Rd1 Qe3 27.Nd4 g6 28.Nf3 Re4 29.Ne5 Rd4 30.Nxg6 Re8 31.Ne5 h5 32.h4??**

I wanted to get rid of my back rank issues and turns out I had the right idea, but the wrong execution. 32.h3! does the same thing but avoids the perpetual check in the notes to the next move.

**32...c5??**

Now the game is over. 32...Rxd1+ 33.Qxd1 Qxg3 34.Qxh5 Re7 35.Qg5+ (Black has a perpetual after 35.Qxf5 Qxh4+ 36.Bh3 Qe1+) 35...Rg7 36.Qxg3 Rxg3 37.Bf3 (to stop 37...Rb3) 37...Rh3+

**33.Rxd4 cxd4 34.Qxf5 Rxe5 35.fxe5**

**1-0**

Position after 13...Kh8

This is the kind of move one plays when one doesn't want to calculate something like ...f5. This combined with my opponent missing 7...Qa5+ gave me the impression that I could push them around some more with:

**14.Bb3 f6?! 15.h4 Bd7 16.h5 gxh5 17.f5!**

No Ng6. Black's king is now surrounded by defenders only optically.

**17...d5 18.Qh4 Be8 19.Ng3 dxe4 20.dxe4 d3 21.Be3!?**

I saw the possibility of the combination that ended up winning the game before 18. Qh4, but for that to work we need the dark square bishop hitting the h6 square.

**21...dxc2 22.Nxh5 Bxh5 23.Qxh5 Qd3 24.Kf2! Qxe4??**

I could not contain my excitement here as my combo now works! White to move and win!

**25.Qxh7+!! Kxh7 26.Rh1+ Bh6 27.Rxh6+ Kg7**

My opponent did not see the idea here and was looking at me with a confused look.

**28.Rh7+ Kxh7 29.Rh1+**

My opponent resigned because they now saw the idea.

**29...Kg7 30.Bh6+ Kh8 31.Bxf8+ Qh4+ 32.Rxh4#**

**9.Qd2**

White's position is now so over-powering that there is no longer need to discuss compensation for the exchange—the material imbalance simply has no significance here.

There are plenty of paths for White to advantage: 9.Nf3 Na6 10.Nfxd4 The black queen is on sabbatical while the black king swims in shark-infested waters.; 9.Qd1 Nc6 10.Nf3 e5? 11.Nxe5+! Nxe5 12.Qxd4+ Ke6 (*12...Ke8 13.Nc7+ Ke7*)

1.d4 Nf6 2.Nf3 d5 3.e3 c5 4.b3 Nc6  
5.Bb2 Bf5

I'm not very familiar with this opening for White. I just try to play natural moves and develop my pieces here.

6.Bd3 Bxd3 7.Qxd3 e6 8.a3

I guess he was worried about Nb4 but I'm not sure I would have played it either way.

8...Bd6 9.Nbd2 cxd4

I was a little worried here White might play e4 next move so I play this to clarify White's plan.

10.exd4 0-0 11.0-0 Rc8 12.Ne5 Qc7  
13.f4 Bxe5 14.fxe5

This move at least shuts down Black's b2-bishop. 14.dxe5 Nd7 15.c4 This also looks nice for White.

14...Nd7 15.Rf3 Ne7 16.c3

White doesn't want to close c2 but he's still not doing his bishop any favors.

16...Qb6

Threatening Nxe5 and eyes b3.

17.Kh1 Ng6 18.Raf1

18.Rh3 f5 19.exf6 Rxf6 20.c4

18...Ndx5

Thought for a while before making this move. I was happy to win the material, but I worried that opening the center might give his bishop better scope after white eventually plays c4. Still, I thought this was my best plan and it gives me good control over the center with my e and d pawns.

19.dxe5 Nxe5 20.Qe2 Nxf3 21.Rxf3 f6

I'm anticipating c4 next move so I'm quick to try to move my pawn chain up and restrict the bishop.

22.Rg3 e5 23.Qg4 Rc7 24.h4

Position after 24.h4

Really lashing out at me here, but White is starting to leave some holes in his own position now.

24...Qf2 25.Rd3 f5

25...e4 26.Rxd5 e3 27.Nc4 e2+ Should have really given this more consideration.

26.Qd1 Rd7

Again I should have considered ...e4. I think I was just afraid of the board

opening up and missing some tactic.

27.c4 d4 28.Qf1 Qxh4+

I knew this was a little risky after Rh3, but with two extra pawns and my connected passers e and d I felt I should win here.

29.Rh3 Qg4

Probably ...Qg5 or ...Qf6 was safer. I ended up in a bit of trouble here getting my queen kicked around.

30.Nf3 Qf4 31.Bc1 Qe4 32.Ng5 Qc6 33.Nxh7

Better this pawn than e5 I figured.

33...Rff7 34.Qe1 Qe4!

Prevents Qh4 and with tempo. White cannot afford to trade the queens being a pawn down and with my passers coming down quickly.

35.Qd1 Qg4 36.Qe1 Qe4

I was getting low on time and needed to make the 40th move time control.

37.Qd1 f4 38.Ng5

38...Qg6 39.Nxf7 Rxf7 40.Qe1 Qf6 41.Qe2 g5 42.a4 Rh7 43.Rxh7 Kxh7 44.Qh5+ Qh6 45.Qxh6+ Kxh6 46.g4

e4 47.Kg2 Kg6 48.b4 Kf6 49.c5 Ke6 50.Kf2 Kd5 51.Bxf4

If White does nothing I'll just leave my pawns where they are, keeping the white king out and pick up the queenside pawns with my own king.

51...gxf4 52.g5 d3 53.g6 Ke6 54.b5

Position after 54.b5

Thought I was completely lost here and nearly resigned. Decided to just play a few more moves to see what happened.

54...e3+ 55.Ke1 f3 56.g7 d2+ 57.Kd1 Kf7 58.g8Q+ Kxg8 59.c6 bxc6 60.bxc6 f2

# The 2022 Ignacio Perez Memorial Northwest Chess Grand Prix

Murlin Varner, bookkeeper

Not too many changes this month. I only added the results for three events. One, however, was the Vancouver Open, with 63 players and a 3x multiplier. THAT had a bit of an impact to the numbers of players, especially among the “others.” A few players improved their leaderboard positions by playing there. I, on the other hand, did not have time to play there and, as a result, I have fallen off the leaderboard. I may not get a chance to get back on it, as I opened my bookstore in Olympia the first of August. Hard to close on the weekend for too many chess tournaments.

Among the changes that did happen, Michelle Zhang moved from first in Washington Class C to the same spot in Class B. Abhay Sankar made a move from second Class D to third Class C. With that move, the entire Washington Class C is new to the leaderboard, including that spot I mentioned above. A new overall leader in Washington too, but you can look at that for yourself.

August should have had a little more impact, as there was the Seattle Seafair Open, the Seattle Chess Classic (3x multiplier) in Seattle and Redmond, the SCC monthly Tornado, and the new format in Boise at the Chandra Alexis Chess Club. In that latter event, rounds are held at 5 PM Mondays during each month. Check them out. September was called Ce Russe Impossible. In October it will be the Genise Wynell Memorial.

Also, in September will be two events in Seattle. These are the SCC Quads on September 17th and the Seattle Fall Open on the weekend of the 24th and 25th. No SCC Tornado in September. And then, on the second weekend in October, the Norman Friedman Memorial makes an appearance in Coeur d’Alene. This is a six-round event with a different time control each round, which is kind of cool. It has a \$1000 guaranteed prize fund, so

will be receiving a 3x multiplier. That means a player could gain as much as 24 Grand Prix points while playing in a truly lovely town on a lovely lake.

Data below current through August 1.
